

# ACCESSTOLAND

A European network of grassroots organisations securing land for agroecological farming

## JOIN THE ACCESS TO LAND ADVOCACY TRAINING CYCLE

*Strengthen your and our network and advocacy skills by sharing this unique training cycle*

The European Access to Land Network invites you to share a newly developed training cycle on advocacy for access to land in order to foster agro-ecology throughout Europe. More than ten years we have strengthened the ties between access to land initiatives all over Europe. Today we find ourselves at a cross-road: if we wish to transform the farming sector from a cause of climate change, biodiversity loss and rural social erosion into a vector of climate mitigation and adaptation, into a guardian of biodiversity and a haven of social cohesion we must build coalition and share tools for change.

Feel invited to join, learn from our partners, bring in your experiences and strengthen others. EU MEP's, advocacy experts, policy makers, lawyers, cooperative companies, farmer unions, training institutions, farming and environmental NGO's, rural networks, citizen initiatives, ... are all part of our E+ financed UP SOL project. We would be delighted to see you benefit from AND strengthen this emerging dynamic.

Here are some crucial dates:

**13.02 2PM - 4PM:** Online seminar with MEP Maria Noichl and TNI staff member Sylvia Kay

**21.03 10AM - 4PM:** Brussels based seminar with MEP Isabelle Carvalhais and ECVC coordinator Eliaz Moreau

**17 – 18.04** (two full days in Brussels): Training with EU Changer on advocacy procedures and strategy development
